

TECHNICAL SKILLS

Automation Testing Tool:

Robot Framework with Selenium and Python

Programming Language and Tools:

Java, JIRA, GitLab, Confluence

Different types of Software Testing:

Unit Testing, Integration Testing, End to End Testing, Regression Testing, Sanity Testing, Manual Testing, Automation Testing

Others:

Create and Execute Automated Tests, Test Case Creation and Execution, Defect and Bug Investigation and Tracking

EDUCATION

Bachelor of Science in Information Technology

STI College Cubao
2016-2019

Bachelor of Science in Information Technology

Informatics College Cainta
2015-2016

AWARDS RECEIVE

Best IT Special Project 2019/Best Thesis 2019

"Integrated Monitoring System for Barangay Poblacion"
Programmer
STI College Cubao

Academic Excellence Awardee

2nd Semester 2016-2017
STI College Cubao

TRAININGS AND SEMINAR

Creative Web Design

April 10, 2018 - April 30, 2018
Mindtech Training and Development Institute Inc.

Web Development

November 30, 2015 - December 2015
EXCEL Technical Skills and Career Center Inc.

WORK EXPERIENCES

Software QA Engineer

January 30, 2023 - Present
Speckl Philippines Inc.

Responsibilities:

- Understand customer needs and gather technical requirements to build appropriate test suites and execute them
- Create automation test script in Gherkin format
- Integrate automated tests with the continuous integration and continuous development (CI/CD) system
- Analyze test results and coordinate with development teams
- Work with Agile Teams on defect resolution, walkthroughs
- Ensure that all deliverables including but not limited to feature files/test cases, test results, automated test scripts, automated regression test results etc., are submitted timely and reviewed by the test lead
- Regularly attend all scrum ceremonies - daily stand up, sprint planning, retrospectives for assigned project
- Ensure that all test artifacts are uploaded to Teams in adherence to the QA guidelines
- Work closely with the test lead to implement new solutions and recommend improvements to the existing processes and framework based on regular feedback gathered
